

**MOUNTAIN BOY MINERALS LTD.**  
*(An Exploration Stage Company)*  
**MANAGEMENT'S DISCUSSION AND ANALYSIS – QUARTERLY HIGHLIGHTS**  
**FOR THE THREE MONTHS ENDED FEBRUARY 28, 2022**

**OVERVIEW AND INTRODUCTORY COMMENT**

Mountain Boy Minerals Ltd. (“Mountain Boy” or the “Company”) is a Canadian based mineral exploration company listed on the TSX Venture Exchange under the trading symbol “MTB” and on the OTCQB under the trading symbol of “MBYMF”. The Company is a Canadian based mineral exploration company with extensive property holdings in the Stewart Camp in the very prolific Golden Triangle of British Columbia.

The Company has six active projects, namely the flagship American Creek project, the BA project, the Surprise Creek project, the Theia project, the Southmore project and the Telegraph project.

Mountain Boy recognizes environmental, social and governance (“ESG”) best practices as key components to responsible mineral exploration and development. The Company’s exploration programs are conducted to meet or exceed environmental regulations, while respecting the communities and environments in which we operate. Mountain Boy strives to earn its social license with local and Indigenous communities by meeting with stakeholders, regulators, and other concerned parties before, and during, exploration work to understand traditional and cultural issues important to these communities. Mountain Boy’s approach is based on transparency, open communication, inclusivity, and respect, to better enable social and economic benefit for communities as well as value for investors.

This MD&A is dated April 19, 2022 and discloses specified information up to that date. Unless otherwise noted, all currency amounts are expressed in Canadian dollars. The following information should be read in conjunction with the unaudited condensed interim financial statements and the related notes for the three months ended February 28, 2022 and the Company’s audited financial statements as at November 30, 2021 and the related notes thereto, prepared in accordance with International Financial Reporting Standards (“IFRS”).

Additional information relevant to the Company and the Company’s activities can be found on SEDAR at [www.sedar.com](http://www.sedar.com), and/or on the Company’s website at [www.mountainboyminerals.ca](http://www.mountainboyminerals.ca).

All currency amounts are expressed in Canadian dollars unless otherwise noted.

## MAJOR QUARTERLY OPERATING MILESTONES

### a) BA and Surprise Creek Projects

On January 10, 2022, the Company announced further results from its 2021 field program on the BA project.

The MJ target was identified through mapping and prospecting and was followed up with limited channel sampling. The zone occurs approximately 3 kilometres to the northeast of the Barbara zone, which has been partially outlined by 182 diamond drill holes. This new zone is at the contact of the underlying Lower Hazelton volcanic rocks and the overlying Upper Hazelton sediments.

Polymetallic mineralization is hosted in a quartz-carbonate stockwork and as disseminations in the volcanic rocks. Several samples assayed high grade silver values with multi percent combined lead and zinc values (see Table 1 for surface sample highlights). This new zone is significant as it establishes another manifestation of the VHMS mineralization and highlights the potential scale of the system. This new target area will be the focus of follow up work in the 2022 field season. Work will include detailed mapping, a drone survey and additional channel sampling.

**Table 1**

Sample No	Target	Samp Type	AgEq (gpt)	ZnEq (%)	Au (gpt)	Ag (gpt)	Cu (%)	Pb (%)	(Zn %)
C0033349	MJ	grab	6745.42	141.41	1.40	5602.00	2.423	16.710	4.030

*\*Silver-equivalent and zinc-equivalent values are calculated using the current commodity spot prices for December 24<sup>th</sup>, 2021. For the purposes of exploration targeting, metal recoveries are*

*assumed to be 100%. Metal price assumptions are US\$23.00 /oz silver, US\$1805.55 /oz gold, US\$4.40 /lb copper, US\$1.05/lb lead and US\$1.60/lb zinc.*

The North Nelson Zone was also discovered in the 2021 field season and is located approximately 4 km to the east from the Barbara Zone. The new discovery occurs along a structure that trends to the south, towards the Nelson Zone. This new zone is highlighted by two soil geochemistry lines that are anomalous in copper, lead and zinc and a grab sample that assayed 1157 g/t silver, 0.35% copper, 0.79% lead and 0.42% zinc. Further mapping and sampling is proposed for the 2022 season with the objective of defining the extent of this prospective target.

An area located at the toe of the Nelson glacier, approximately 7 km east from the Barbara zone has returned a grab sample assaying 11.3 g/t gold and 0.2% copper. This sample and area will be further explored in the 2022 season.

#### **b) Telegraph Project**

On December 13, 2021, the Company announced the results from its 2021 field program on the Telegraph Project.

A significant new discovery, approximately three kilometres southeast of the DOK Main Zone, produced 19 surface samples that assayed 0.5% copper and greater. This new zone is traceable over 400 metres and assayed up to 17.9% copper (sample E075465). The zone straddles what historically would have been two separate claim blocks owned by different companies. It is also on the margin of the known Red Creek copper-gold soil geochemistry anomaly.

A second new zone was discovered a further one kilometre from the above-mentioned zone, along the same south-easterly trend. This zone also yielded several samples over 1% copper.

On the eastern portion of the property, a third new zone of elevated copper values was discovered. This zone, called Yeti West, also produced a number of samples that assayed greater than 1% copper, with the highest assaying 3.6% copper (sample C0034000). This zone trends over 700 metres.

Several samples also produced elevated values of molybdenum (up to 980 ppm), lead and zinc (sample C0033532 assayed 24.6% lead and 25.7% zinc).

In addition to mapping and prospecting, 2014 drill core samples and surface samples were selected for short wave near infrared ("SWIR") analysis. The SWIR analysis was performed by Dr. Farhad Bouzari from the Mineral Deposits Research Unit ("MDRU"), at the University of British Columbia ("UBC"). The purpose of this analysis is to identify alteration minerals and characterize the style of mineralization. Initial results from the SWIR analysis confirm the presence of porphyry-style alteration minerals and suggest that multiple hydrothermal pulses have altered and mineralized the host rocks in both the DOK Main and Yeti areas.

The findings from field work further confirm the potential for large copper-gold porphyry systems on the property and outlined new prospective areas for future exploration.

Eighty drill core and forty-three surface samples from the Telegraph project have been included in a Federal Government funded research program known as the Targeted Geoscience Initiative (TGI-6). Dr. Christopher Lawley is a gold metallogenist and geochemist who has been working with the Geological Survey of Canada (GSC) since 2012. Last summer, the Targeted Geoscience Initiative (TGI) program was renewed with a particular focus on critical raw materials. Research will focus on the concentrations of Re, Bi, Te, Se, and PGE in porphyry and epithermal mineral systems in the Golden Triangle. These elements are poorly understood because of their complexity and the superposition of many mineralizing events. Copper is also included in this study as it is defined as a critical metal. This research has practical applications in identifying ore controls and ore guides. This research is being conducted in collaboration with the British Columbia Geological Survey and MDRU at UBC. Preliminary results are anticipated in the new year.

Additional samples collected in the latter part of the 2021 field season are being sent in for SWIR analysis. Results and interpretation of these results will be integrated with the other available data (geochemistry, geophysics, radiometric) to help evolve Mountain Boy's understanding of the mineralizing systems underlying the Telegraph property

### **c) Corporate update**

On March 24, 2022, the Company announced the formation of a Technical Advisory Board chaired by its director Dorian L. "Dusty" Nicol and includes Dr. Bruce Gemmell and John Ryan. In addition, the Company extended its collaboration with the MDRU at the UBC, with Dr. Farhad Bouzari continuing to provide his expertise. These specialists will support the in-house geological team, led by Lucia Theny, Vice President of Exploration.

## **QUATERLY FINANCIAL CONDITION**

### *Capital Resources*

On December 30, 2021, the Company completed a non-brokered private placement by issuing 7,587,057 flow-through units ("FT Unit") at a price of \$0.17 per FT Unit for gross proceeds of \$1,289,800. Each FT Unit consists of one common share and one-half of one warrant for a total of 3,793,530 warrants issued. Each full warrant is exercisable at \$0.26 for two years expiring on December 30, 2023. The Company also completed a non-brokered private placement by issuing 882,353 units ("Units") at a price of \$0.17 per Unit for the gross proceeds of \$150,000. Each Unit consists of one common share and one-half of one share purchase warrant for a total of 441,177 warrants issued. Each full warrant is exercisable at \$0.20 for a period of two years expiring on December 30, 2023. In connection with the financing, the Company paid \$50,933 as a cash finder's fee and issued 303,104 finder's warrants exercisable at \$0.17 for two years expiring on December 30, 2023.

On January 14, 2022, the Company issued 200,000 common shares with a fair value of \$34,000 to the optionor for the DOK property.

On February 25, 2022, the Company issued 200,000 common shares with a fair value of \$33,000 to the optionors for the Dorothy property.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or ability to raise funds.

The Company is aware of the current conditions in the financial markets and has planned accordingly. The Company's current treasury and the future cash flows from warrants and options, along with the planned developments within the Company as well as with its JV partners will allow its efforts to continue throughout 2022. If the market conditions prevail or improve, the Company will make adjustment to budgets accordingly.

#### Liquidity

As at February 28, 2022, the Company's working capital was \$1,376,768 (November 30, 2021 - \$822,562). With respect to working capital, \$762,884 was held in cash (November 30, 2021 - \$191,573). The increase in cash of \$571,311 was mainly due to cash provided by operating activities of \$274,949 and net proceeds from the issuance of common shares of \$1,354,310, while being offset by \$482,172 used in exploration and evaluation assets and \$25,878 in reclamation bonds.

#### Operations

During the three months ended February 28, 2022, the Company reported a loss of \$282,092 (\$0.00 loss per share) (2021 – \$11,745 (\$0.00 loss per share)).

The Company's general and administrative expenses amounted to \$202,390 during the three months ended February 28, 2022 (2021 – \$143,146), an increase of \$59,244 mainly due to the increases in (a) accounting and audit fees (from 2021's \$26,000 to 2022's \$59,250); (b) consulting fees (from 2021's \$7,216 to 2022's \$43,507); (c) legal fees (from 2021's \$Nil to 2022's \$4,410); (d) management fees (from 2021's \$25,900 to 2022's \$28,100) because more of the Chief Executive Officer's amounts were being allocated to general administrative expenses as opposed to the properties; and (e) shareholder communication fees (from 2021's \$12,590 to 2022's \$27,565); while being offset by a decrease in (f) office and miscellaneous expenses (from 2021's \$33,743 to 2022's \$6,138). All these increases were to support the exploration activities at the Company's properties. The Company continues to monitor its use of cash and has been actively seeking ways to conserve cash.

The other major item for the three months ended February 28, 2022, compared with February 28, 2021 was:

- Settlement of flow-through premium liability \$Nil (2021 – \$52,879);

- Fair value loss on marketable securities of \$81,630 (2021 – fair value gain of \$45,061); and
- Realized gain on marketable securities of \$Nil (2021 – realized loss of \$32,584).

## SIGNIFICANT RELATED PARTY TRANSACTIONS

During the quarter, there was no significant transaction between related parties.

## COMMITMENTS, EXPECTED OR UNEXPECTED, OR UNCERTAINTIES

As of the date of this MD&A, other than disclosed in this MD&A – Quarterly Highlights, the Company has does not have any commitments, expected or unexpected, or uncertainties.

## RISK FACTORS

In our MD&A filed on SEDAR March 10, 2022 in connection with our annual financial statements (the “Annual MD&A”), we have set out our discussion of the risk factors *Exploration risks*, *Market risks* and *Financing risk* which we believe are the most significant risks faced by the Company. An adverse development in any one risk factor or any combination of risk factors could result in material adverse outcomes to the Company’s undertakings and to the interests of stakeholders in the Company including its investors. Readers are cautioned to take into account the risk factors to which the Company and its operations are exposed. To the date of this document, there have been no significant changes to the risk factors set out in our Annual MD&A.

## DISCLOSURE OF OUTSTANDING SHARE DATA

The authorized share capital of the Company consists of an unlimited number of common shares without par value. The following is a summary of the Company’s outstanding share data as at February 28, 2022:

	Issued and outstanding	
	February 28, 2022	April 19, 2022
Common shares outstanding	54,142,151	54,142,151
Stock options	4,985,000	6,215,000
Warrants	9,809,707	9,809,707
Finder's warrants	303,104	303,104
Fully diluted common shares outstanding	69,239,962	70,469,962

## **QUALIFIED PERSON**

Mr. Andrew Wilkins, P.Geol, is a Qualified Person, as defined by National Instrument 43-101. Mr. Andrew Wilkins has reviewed the technical contents of this MD& A.

### **Cautionary Statements**

This document contains “forward-looking statements” within the meaning of applicable Canadian securities regulations. All statements other than statements of historical fact herein, including, without limitation, statements regarding exploration results and plans, and our other future plans and objectives, are forward-looking statements that involve various risks and uncertainties. Such forward-looking statements include, without limitation, our estimates of exploration investment, the scope of our exploration programs, and our expectations of ongoing administrative costs. There can be no assurance that such statements will prove to be accurate, and future events and actual results could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from our expectations are disclosed in the Company’s documents filed from time to time via SEDAR with the Canadian regulatory agencies to whose policies we are bound. Forward-looking statements are based on the estimates and opinions of management on the date the statements are made, and we do not undertake any obligation to update forward-looking statements should conditions or our estimates or opinions change, except as required by law. Forward-looking statements are subject to risks, uncertainties and other factors, including risks associated with mineral exploration, price volatility in the mineral commodities we seek, and operational and political risks. Readers are cautioned not to place undue reliance on forward-looking statements.
